# Corporate
Presentation

Current State

An Education institute has to maintain multiple IT vendors and technology to manage the day to activities, plan and have insight to take decisions.

Edu Colours changes that with its EDUNET platform.

About
Edu Colours

Edu Colours provides the most comprehensive education management system for all the stakeholders in the education system from Nursery to PG and post that till the student is employed.

The most comprehensive Education Management System

We have created touch points and usability for management, teachers administrators, parents, students as well as vendors and ensured that they are brought at one platform not only for interaction but to add value and increase the quantum of learning.
We have also built E-Learning modules and bringing Classroom Management Systems.

EDUCOLOURS

FEW KEY FEATURES

- Role base Access.
- A complete bird's eye view.
- Auditable Transactions – Brings transparency.
- Complete Blue print of branch can be tracked. (From empty land to constructed area with all information recorded with build blocks, number of floors, rooms, room type, Sq. Ft. of room, count of tables and chairs in a class etc.)
- USID(Unique Student Identification)
  - Every student will be given a unique student identification for life long. This I.D will be mapped to all the departments to the particular school(Exams, fees, library, transport, inventory, hostel)
  - USID will be auto synced with Aadhar card
- LMS Integration.
- We are monitoring the E-Service book to staff like attendance, performance, marks and grades for students.
- **QR CODE** generated answer sheets from USID for each student.
- Cloud storage for every student for life long.
- Health – Monitoring of Periodic Vaccinations for Students according to age and alerts to parents.
- Support service and call center facility available for 24/7.
- Geo tracking authentication for attendance and end to end tracking from ground reality on click base and the same can be escalated to high level management.
- Complete control of KT Transfer to meet employee, which can give end to end report to particular state or Central Government.
- Manual record of each school will be digitalized and centralized information system will be accessed through cloud.
- Real time monitoring and reporting system can be provided school information and historical data.

EDUCOLOURS

Deep Analytics

Edu Colours helps you gather the most minute information of your educational system without any difficulty. With the easy touch points, it becomes easy for the stakeholders to get in touch with each other. This ensures that important information remains in the loop and the interactions run smooth between all the stakeholders. Edu Colours also retains your historic data, hence you can always trace back any information that is needed.
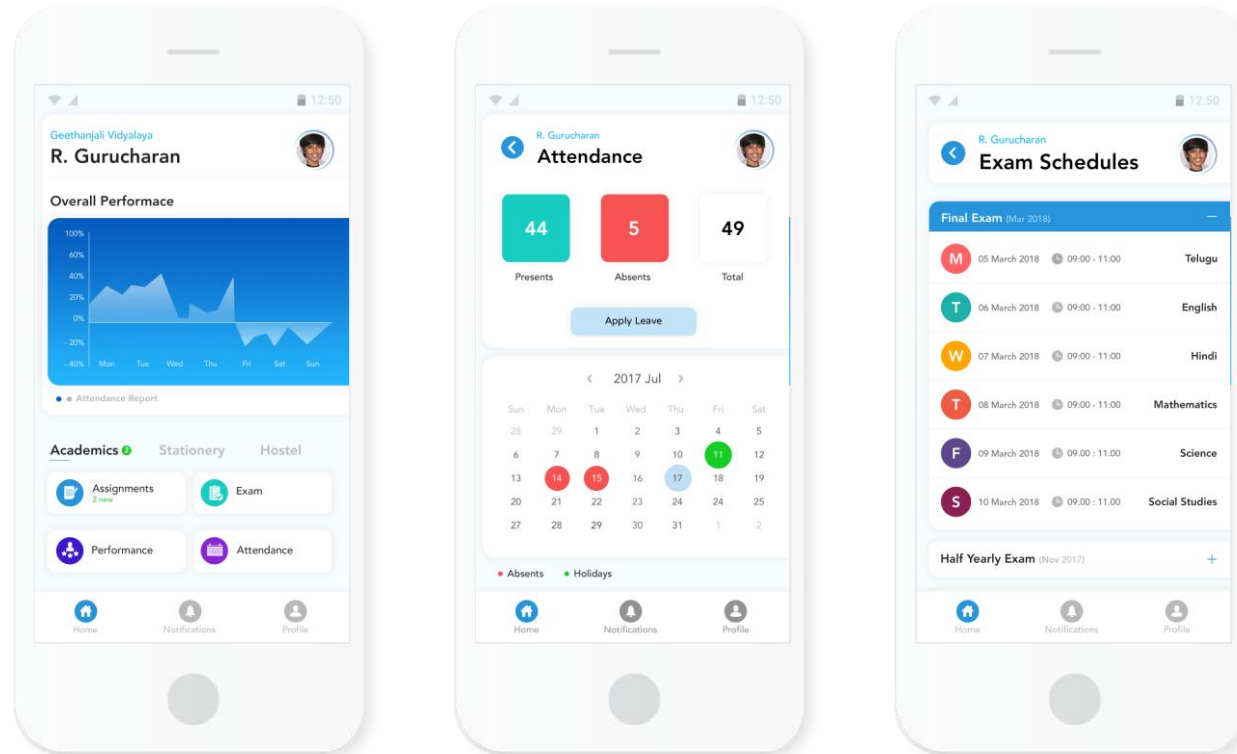

Special Monitoring

Edu Colours comes with a feature called "special monitoring". The feature is exclusively for the staff as it provides the information about the students who might need some extra help. Hence, even if the class strength is more, the teachers won't miss out on any student.
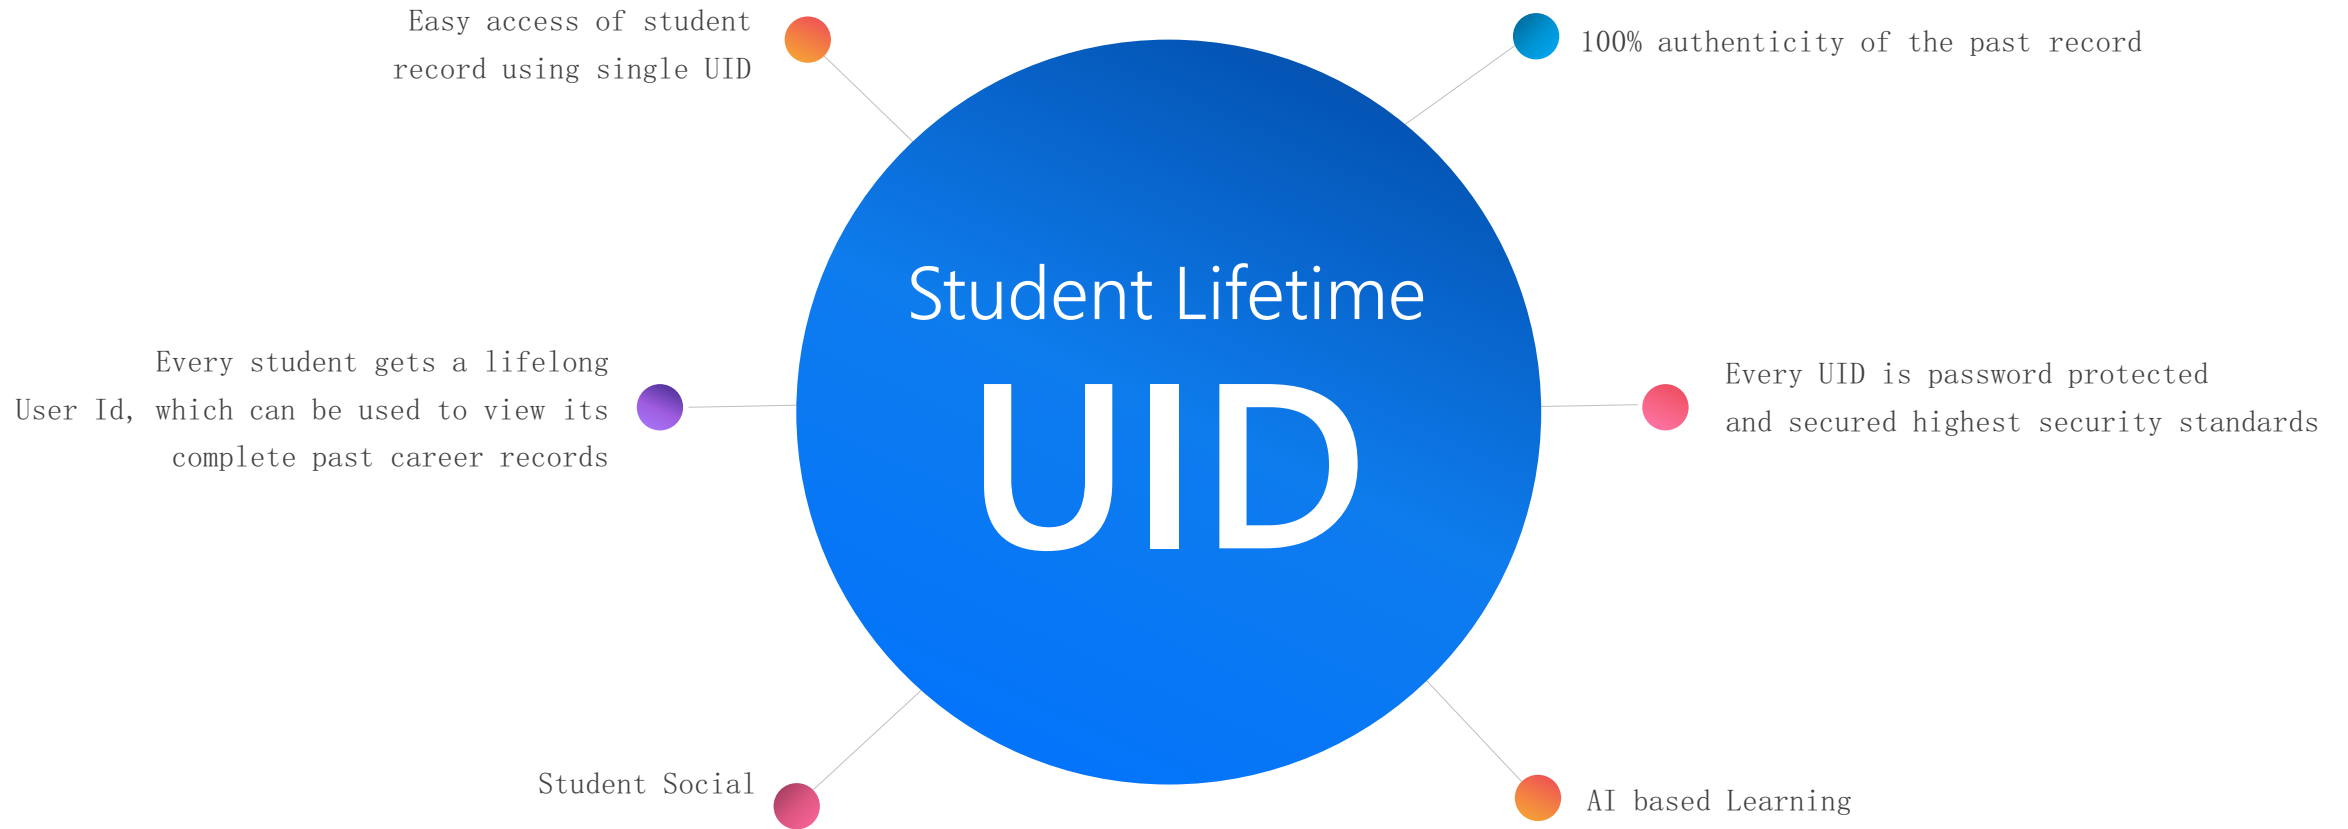

Mobile success school App

Edu Colours mobile per are designed for all the parents and staff with easy accessible features. The app helps the users to keep track of all the activities taking place in the institute. It makes sure that the interaction between the users is smooth and all the information is passed without any hindrance.

for parents and teachers
